Summary

Computer Science undergraduate specializing in full stack development with strong problem-solving skills and a solid foundation in data structures and algorithms. Experienced in building scalable web applications and AI-based systems with a focus on performance optimization, automation, and real-time data processing.

Education

B.Tech in Computer Science and Engineering	2023 – 2027
MLR Institute of Technology	80.1%
Intermediate (Class XII)	2021 – 2023
TSMS Junior College	86.7%
SSC (Class X)	2021
TSMS	95%

Experience

Full Stack Developer Intern — Infosys

Jan 2025 – Mar 2025

SmartShelfX – AI-Based Inventory Forecast & Auto-Restock System

[GitHub](#)

Developed an intelligent inventory platform leveraging AI for demand forecasting and automated restocking.

- Engineered AI-driven inventory system improving stock prediction accuracy by **25%**
- Architected full stack system using **Angular 19, Node.js (Express), and MySQL**, improving scalability and reducing response time by **30%**
- Implemented **JWT-based authentication**, enhancing system security and reducing unauthorized access risks by **50%**
- Improved real-time inventory tracking reducing manual effort by **40%**
- Integrated **Python ML models** (TensorFlow/Scikit-learn), improving prediction efficiency by **20%**
- Automated restock recommendations, reducing stockouts and overstocking by **35%**
- Established alert mechanisms for low stock and real-time notifications
- Created analytics dashboards to deliver actionable business insights

Projects

SNIPE Store – E-commerce Platform

[sniipe.in](#)

Role: Frontend Developer

- Developed responsive UI using **React and Tailwind CSS**, improving user experience by **30%**
- Integrated **Supabase Auth**, improving authentication reliability and session security by **40%**
- Integrated frontend with backend APIs, improving workflow efficiency and reducing user friction by **25%**
- Improved performance through efficient component rendering, reducing page load time by **30%**
- Integrated **Razorpay** payment gateway for secure transactions

Q-Less – Virtual Queue Management System

[GitHub](#)

Role: Backend & Database Developer

- Developed scalable backend using **Flask, Redis, and WebSockets**, supporting **1000+ concurrent users**
- Achieved real-time synchronization with **sub-millisecond latency**
- Engineered **PostgreSQL schemas** for high-concurrency systems
- Implemented **NLP-based triaging** for intelligent request prioritization
- Reduced physical waiting time by **60%** using virtual queue system
- Implemented predictive wait-time estimation and alert system, improving scheduling accuracy by **35%**

Certifications

- Web Development Fundamentals – IBM SkillsBuild (2026)
- JavaScript Essentials 1 – Cisco Networking Academy (2026)
- Introduction to DevOps – Microsoft Learn (2026)
- Describe Cloud Computing – Microsoft Learn (2026)
- TCS iON Career Edge - Young Professional – Tata Consultancy Services (2026)

Skills

Programming Languages: Java, Python, C

Frontend: HTML, CSS, JavaScript, React.js

Backend: Spring Boot, Node.js, REST APIs

Database: SQL, JDBC, MongoDB

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving

Tools: Git, GitHub, VS Code, Antigravity
