

ADDISON HARRIS

Full Stack Developer | Cloud & Microservices Specialist

📞 (234)-555-1234 @ Email 🔗 linkedin.com 📍 Indianapolis, Indiana

SUMMARY

Full Stack Developer with 5+ years of experience building and scaling cloud-native applications. Skilled in Java, Spring Boot, React, and AWS, with a proven track record of boosting performance by 25%, cutting deployment times by 40%, and improving code quality through automated testing. Adept at collaborating with clients and cross-functional teams to deliver reliable, user-focused software solutions.

EXPERIENCE

Full Stack Developer

Tech Solutions Inc. 📅 06/2021 - 01/2023 📍 Indianapolis, IN

- Led a team of developers to enhance application performance, resulting in a 25% increase in processing speed and improved user satisfaction.
- Developed and deployed microservice-based applications in AWS environment, increasing system reliability by 20% with strong emphasis on maintainable code.
- Implemented unit and integration tests, improving code quality by achieving a 95% test coverage rate.
- Collaborated closely with clients for custom solutions, enhancing project delivery timelines by 15% due to agile methodologies.
- Worked with databases such as PostgreSQL and DynamoDB for data integrity, leading to a 30% reduction in data retrieval times.
- Identified process inefficiencies and proposed creative solutions, resulting in streamlining operations and reducing costs by 10%.

Software Engineer

Innovatech LLC 📅 04/2019 - 05/2021 📍 Cincinnati, OH

- Developed seamless user interfaces using ReactJS, enhancing user engagement metrics by 30% through improved UI/UX design.
- Worked on AWS EC2, ECS, and Lambda to deploy scalable applications, leading to a 40% improvement in deployment efficiency.
- Conducted thorough code reviews and mentorship, improving team coding standards and decreasing bug count by 20%.
- Integrated New Relic monitoring tools, successfully reducing application downtime by 15% through proactive alerting.

Junior Developer

Future Tech Hub 📅 01/2018 - 03/2019 📍 Louisville, KY

- Assisted in developing features for a Ruby on Rails application, leading to a 20% increase in customer satisfaction ratings.
- Collaborated with cross-functional teams to smooth deployment cycles, shortening response times to customer feedback by 25%.
- Examined and optimized front-end Javascript codebase, enhancing performance and reducing load times by 15%.

EDUCATION

Master of Science in Computer Science

Purdue University 📅 2015 📍 West Lafayette, IN

CERTIFICATION

AWS Certified Solutions Architect

Offered by Amazon Web Services, focusing on designing distributed applications on AWS.

Full Stack Development with React

Provided by Coursera, taught techniques for building robust React applications.

TECHNICAL STACK

Front-End Development

ReactJS, JavaScript (ES6+), HTML5, CSS3, UI/UX Design Principles

Back-End Development

Java, Spring Boot, Ruby on Rails, Python, REST APIs

Cloud & Infrastructure

AWS (EC2, ECS, Lambda, DynamoDB, S3), CI/CD Pipelines, Docker, New Relic Monitoring

Databases

PostgreSQL, DynamoDB

Collaboration & Process

Agile Methodologies, Code Reviews, Client Collaboration, Technical Documentation
